

# 400 SERIES

At our facilities in Finland and New Zealand, each head is made to order, so you get exactly what you need. Our heads are built to work with advanced technology providing precise control with accurate diameter and length measuring. With on-site facility testing, each product is proven on our time to be profitable on yours.

Our commitment to your success goes beyond product quality. When you put our heads to work, our global support network goes to work for you – from helping you choose the right head, to installation and startup, to being on site when you need us.

We offer the widest range of harvester/processor heads on the market. So whether you're harvesting at the stump, processing at the landing or somewhere in between, Waratah is built to work for you all over the world.

"Our production is great with Waratah.
The uptime is second to none."

Drew Betts, Owner, Clay Hill Equipment

## 400 SERIES

Proven in mixed stand and multi-tree harvesting applications, Waratah 400 Series harvesters balance production with precision.

High-tensile steel frames engineered for maximum performance, while providing good visibility to the tree

Stump treatment and color marking spray options

High performance saws with ample cutting capacity and automatic control for optimum performance in harvesting applications

Saw box designs to improve productivity and extend durability offering low stump heights

Delimb knives provide the best possible delimbing for large- and small-diameter wood

> Large knife and feed roller openings for fast stem catching and productive tree harvesting

Superior tree holding, log handling, and processing of straight and crooked trees

Rotator options to suit many carriers Multi-tree harvesting options for some models Several junction box configurations available to suit many applications Advanced on-board controller and diagnostics Highly efficient, high performance valves providing responsiveness and speed **Dual diameter sensors** for accurate log volumes, assortments, and providing optimum head performance Optional top saw on some models increases productivity Fixed and floating front knife options for many applications providing optimum delimbing coverage Extreme measuring accuracy with the latest sensor technology and many measuring wheel options Specialized guarding packages for snow and harsh applications **High torque high performance** feed motor options Drive wheel options for optimum wood quality, debarking or maximum traction in crooked wood

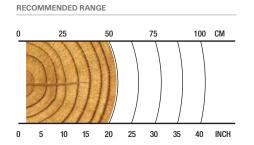

If you're looking for a top producer in a variety of wood sizes, the H423 is well-suited for the task. It has superb delimbing performance in all diameters, outstanding multi-tree harvesting qualities and an excellent power-to-weight ratio, taking productivity to a higher level.

OVERVIEW

Harvesting in early-to-late thinnings

APPLICATIONS

Softwood harvesting Multi-tree harvesting

4-50cm/1.6-19.7 in.

SPECS

955 kg / 2,105 lb. Weight (Without Rotator & Link)

28 MPa / 4,061 psi Maximum Hydraulic Requirement

**560 mm / 22.0 in.** Max Upper Delimb Opening

**560 mm / 22.0 in.** 

580 mm / 22.8 in.
Maximum Cutting Capacity

14-20 metric ton

Carrier Size

🕯 13-21 metric ton

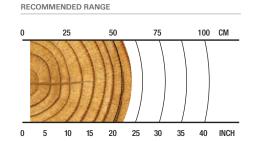

Characterized by its consistent performance and skill set in second thinnings and early regeneration cuttings, the versatile H424 is equally suited for processing or debarking applications. With a durable frame, well-protected hosing, feed power and ample cutting capacity, it's a very capable all-around head for mid-sized harvesters.

OVERVIEW

Harvesting in early and second thinnings; early regeneration harvesting.

APPLICATIONS

Softwood harvesting Mixed stand (hardwood and softwood) harvesting Multi-tree harvesting **Processing** Debarking

4-57cm/1.6-22.4 in.

SPECS

1105 kg / 2,436 lb. Weight (Without Rotator & Link)

28 MPa / 4,061 psi Maximum Hydraulic Requirement

610 mm / 24.0 in.

430 mm / 17.0 in. **Delimbing Diameter Tip-to-Tip** 

640 mm / 25.2 in.

620 mm / 24.4 in.
Maximum Cutting Capacity

🛌 17-22 metric ton

16-21 metric ton

Optimizing performance, productivity and delimbing, the H425 excels in large diameter regeneration harvesting. With a powerful control valve and feed-roller arm geometry that ensures a solid grip, log control is only an afterthought.

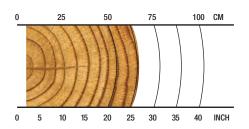

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting Mixed stand (hardwood and softwood) harvesting Multi-tree harvesting

5-65cm/2-25.6 in.

SPECS

1360 kg / 2,998 lb. Weight (Without Rotator & Link)

**28 MPa / 4,061 psi**Maximum Hydraulic Requirements

680 mm / 26.8 in. Max Upper Delimb Opening

680 mm / 26.8 in. Max Feed Roller Opening

710 mm / 28.0 in.

18-25 metric ton

Carrier Size

20-25 metric ton Carrier Size

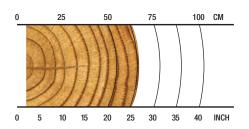

The rugged H425HD is built to work on your toughest jobs. A heavy-duty tilt frame, feed motors and guarding provide even more durability. With a powerful control valve and a top saw option, this high-performance head will become your top choice for wheeled carrier applications.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting Mixed stand (hardwood and softwood) harvesting Multi-tree harvesting RECOMMENDED RANGE

5-65cm/2-25.6 in.

SPECS

1390 kg / 3,064 lb. Weight (Without Rotator & Link)

**28 MPa / 4,061 psi**Maximum Hydraulic Requirements

680 mm / 26.8 in.

Max Upper Delimb Opening

680 mm / 26.8 in.
Max Feed Roller Opening

710 mm / 28.0 in.
Maximum Cutting Capacity

18-25 metric ton

20-25 metric ton

Carrier Size

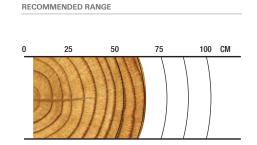

Equally comfortable on track machines, the H425X comes equipped with an extreme duty main saw box and excels in mixed stand harvesting. With a powerful control valve, high-performance drive motors, precision delimbing and optional top saw, "backing up" will not be in your vocabulary.

OVERVIEW

Harvesting in late thinnings; regeneration harvesting; tracked and wheeled machine applications.

APPLICATIONS

Softwood harvesting Mixed stand (hardwood and softwood) harvesting Multi-tree harvesting

5-65cm/2-25.6 in.

SPECS

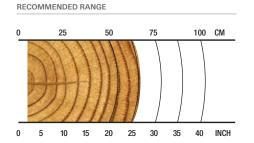

Experience counts, and the popular H480C is no exception. This aggressive head well-known for its large diameter capacity, optimized feed force and processing speed gives excellent and unprecedented tree processing especially in crooked timber.

OVERVIEW

Harvesting in early-to-late thinnings; regeneration harvesting.

APPLICATIONS

Softwood harvesting Multi-tree harvesting

5-65cm/2-25.6 in.

SPECS

 $1350 \; kg \; / \; 2,976 \; lb.$  Weight (Without Rotator & Link)

28 MPa / 4,061 psi Maximum Hydraulic Requirement

680 mm / 26.8 in.
Max Upper Delimb Opening

680 mm / 26.8 in.

710 mm / 28.0 in.

18-25 metric ton
Carrier Size

### **MEASURING AND CONTROL SYSTEMS**

We focus on providing you with accurate diameter and length measuring systems for profitable precision. Simplify operations and boost productivity with real-time statistics and measuring information, and wireless data transfer.

## TIMBERRITE™ H-16

Imagine a fast, powerful control system that manages your workload and links your office to the forest.

The productive TimberRite measuring and control system uses a powerful Windows PC, providing accurate measuring technology and responsive head control for efficient operational productivity.

It records production information, tracks productivity, and packages all files in the latest StanForD 2010 format to ensure data interchanges with virtually any professional system in the forest industry.

Additionally, this user-friendly system has email capabilities, and can utilize our WaratahMate™ smartphone app for the efficient and timely transfer of production information and other important files regardless of your location. Configurable as standard with Pre-Selection priority, or optionally with Value Optimization it can manage your output to keep step with market demands. TimberRite keeps you productive and informed to manage your workload for whatever your market requires.

#### KEY FEATURES

- $\cdot \textbf{Onboard mapping} \cdot (\text{optional}) \cdot \text{access your location and visualize your production data}.$
- **Pre-Selection Priority** (standard) sequential optimization by cutting list instruction, and alternate log assignments.
- · Value Optimization (optional) value-based optimization, intuitive prognosis through intelligent assessment of advanced matrices.
- · Touch-screen display, or wireless keyboard and touch pad mouse.
- Windows™ PC based controller integrates the harvester head measuring and control system with the high processing power of a personal computer.
- StanForD 2010 file structure ensures data interchanges with other professional systems in the forest industry.
- Automatic file sending production reports, worksite instructions, repair follow-ups, calibration history, log tables, machine settings and harvesting instructions.
- WaratahMate™ smartphone app Easily transfer data wirelessly regardless of location, or through email via phone USB.
- · Work & repair statistics Monitor uptime, productivity and operating costs.
- · Species specific calibration and soft-clamping settings for delimb and drive arms.
- · Operator specific settings and configurable menus for quick navigation and adjustments.
- $\cdot \textbf{Extensive site documentation} \cdot \textbf{expanded site, contractor, and machine information}.$
- Simplified diagnostics input and output tests with built-in diagnostic troubleshooting assistance.

### **OPTIONS**

Waratah heads are congurable to your application. Consult your dealer for option availability.

#### Configurability

Waratah has a wide range of focused options for harvesting and processing applications including single- and multi-stem processing, multi-tree handling, and all models include options for softwood, crooked hardwood and debarking.

#### **Color Marking**

Waratah offers nozzle-applied color marking systems to simplify log identification. Three colors provide many assortment combinations Improving sorting and yard safety.

#### Main Saws, Saw Motors, Top Saws

The 400 series have high-cutting capacity, main saws with saw boxes designed for quick cross cutting. All saw units have auto tensioning 0.404 pitch chain driven by efficient, high torque motors. Additionally, the H415 and H480C models have an optional top saw for extra efficiency in crooked wood applications.

#### Measuring Wheels

Application-specific measuring wheels are engineered for accurate and consistent measuring in all tree species with enhancements for log quality. Selections include wide and narrow models, coarse and fine teeth options, and multi-stem, debarking configurations.

#### **Delimb Arms**

Delimb arms are engineered for fast stem catching and durability in the toughest applications. Knife profiles ensure quality delimbing throughout the recommended diameter range.

#### **Rotators**

Waratah offers high torque and productive rotator motor and hose bulkhead options on all of the 400 series models.

#### Feed Rollers

Many feed roller options are available for a variety of applications, offering improved traction and reducing fiber damage. Wheel options include eucalyptus debarking, rib, v-type, MTH, Moipu, MenSe, thumbnail, aggressive and many combination styles.

#### Multi-tree Harvesting

Select models have multi-tree harvesting (MTH) capabilities, providing superior accumulating and precise bundle feeding with the option. MTH ability increases productivity and can easily be installed between the rotator and hanging bracket – even on existing heads.

#### Front Knives

Waratah offers heavy-duty floating or fixed front knife options with specialized profiles and cutting edges for superior delimbing in any application.

#### Stump Treatment

Waratah has nozzle or bar-applied stump treatment kits.

Talk to your Waratah dealer about more available options.
